About the conference :

Rapid developments in the area of Information Technology in the past years led to unprecedented increase in the number of people using these technologies and also the interest in research and development. INCETAIBCT'24 will provide opportunities to students, research scholars and teachers in academic institutions and industrial experts in the field of IT to update their knowledge and allow them to share their ideas for further collaborative works in the future.

Conference Theme :

The Primary objective of the 'International Conference on Emerging Trends In Artificial Intelligence and Block Chain Technology' to accumulate the best ideas and scientific results in the field of Artificial Intelligence, Machine Learning, Internet of Things (IOT), Data Analytics and Cybersecurity in various applications. This conference will be an unique event focusing on recent developments in scientific algorithms, advanced software tools, novel cybersecurity approaches in the healthcare domain. This brings together the latest technology advancements and practical examples to apply AI and data analytics to solve business and societal challenges. Attendees will hear from the leaders and eminent speakers from top institutions. Also, this conference is a best platform for exchange of ideas, and it provides an interactive platform for institute and industry interactions.
